#### Description

After pressing the "Generate Verification Code" button during the account creation process, the website no longer displays error details if invalid text is entered into the account creation fields.

#### Steps to Reproduce:

1. Navigate to the account creation page on the website: <https://www.autokarma.ro/creare-cont>
2. Enter invalid invalid data on the field and also you can leave the fields empty
3. Click "Genereaza cod de verificare"
4. Observe that the website does not display error messages for the invalid email or other fields.

5. An unallowed message is appearing: “error\_account“

**Expected Result:**

The website should provide error messages indicating that the email address and other fields contain invalid data, as it did before pressing the "Generate Verification Code" button.

**Actual Result:**

After pressing the "Generate Verification Code" button, the website no longer displays error details, making it difficult for users to identify and correct input errors, also displaying a forbidden message.

### Description

When attempting to add items to the cart, the quantity field does not enforce the maximum limit of 25 pieces. Instead, it allows the entry of letters and special characters.

### Steps to Reproduce:

1. Go to [www.autokarma.ro](http://www.autokarma.ro)
2. Hover “Universale” and click any category
3. In the quantity field, enter "abc" or special characters such as "!@# \$" and attempt to add the item to the cart.
4. Click “Adauga in cos”

### Expected Result:

The system should only accept numerical values for the quantity field and restrict entries to a maximum of 25 pieces.

### Actual Result:

The system allows the entry of non-numeric characters and does not enforce the quantity limit of 25 pieces, also displaying the message: “Succes! Ai adaugat Product X in cosul de produse”

**Environment:**

- Browser: [Google Chrome]
- Operating System: [Windows 11 64 bit]
